
Building a Movie Recommendation Engine

Vikrant Chaudhary

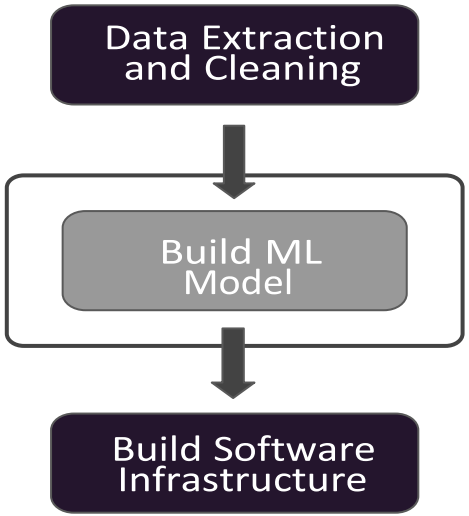
Under the guidance of

Mr. Sanjay Kumar Singh

PROJECT OBJECTIVES

- Recommendation Systems
- Revise Some Math
- Build it!

Machine Learning Pipeline



Supervised Machine Learning

Features

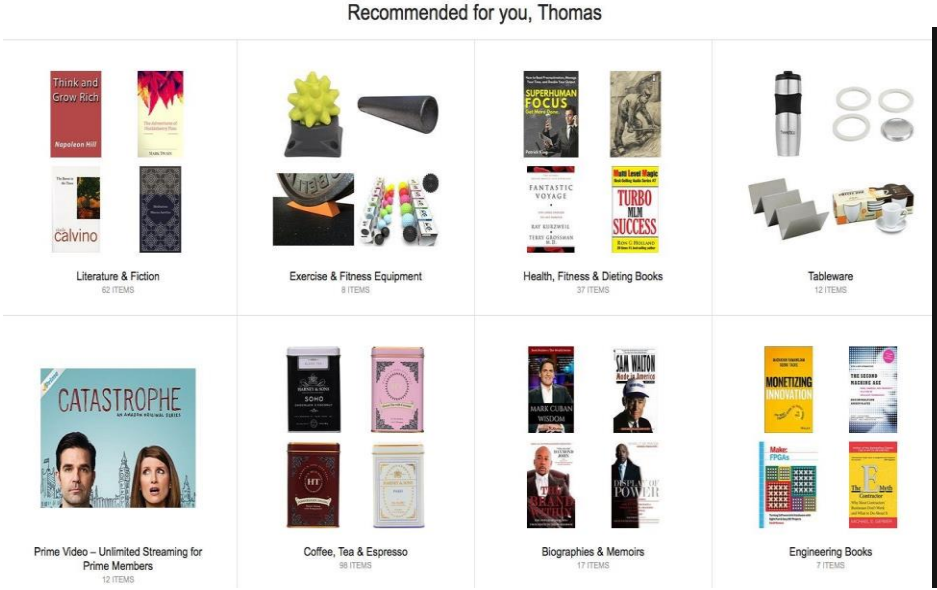
House Size (Sq feet)	Location	Age (years)	Prize (Lakh Rs)
500	Mumbai	2	70
1500	Pune	3	100
2000	Banglore	4	60
1000	Mumbai	2	?
3000	Pune	10	?

Training Data

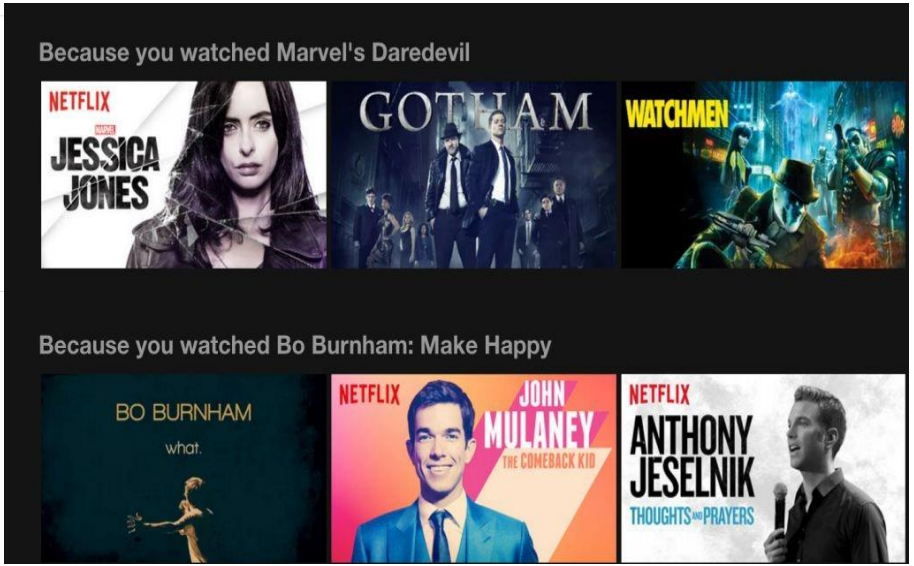
Test Data

What's Common?

1. Amazon



2. Netflix



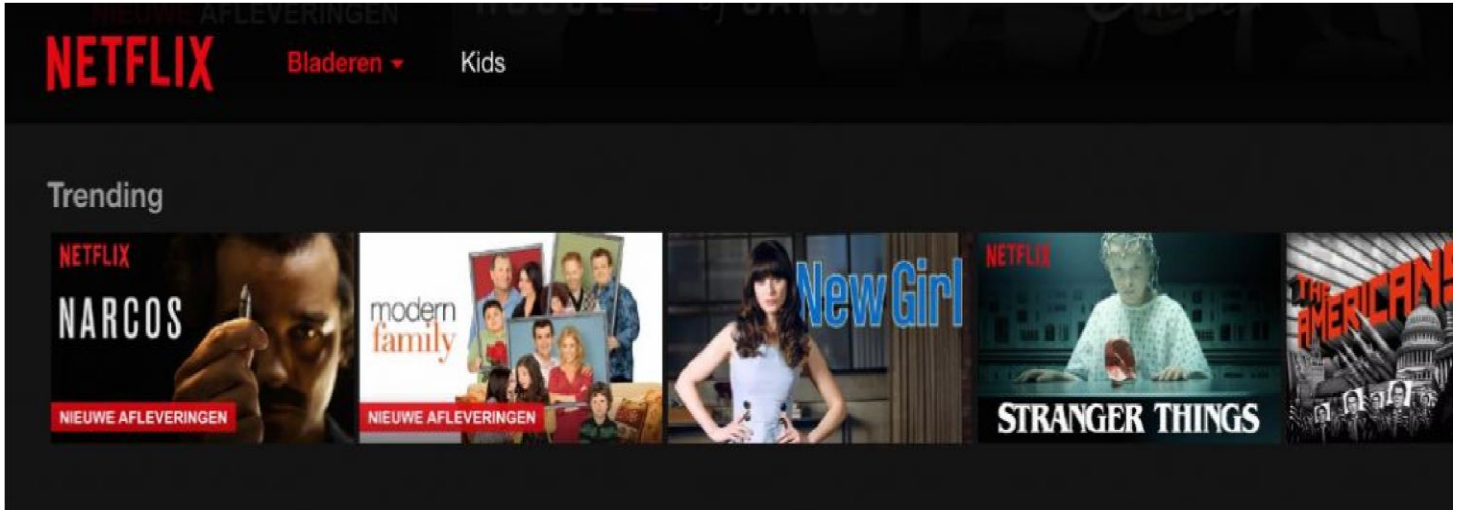
QUIZ

Who are the **Users** and **Items** for RE in the following platforms?

1. LinkedIn — Users: Members; Items: Members
2. Amazon — Users: Members; Items: Products (E.g. Books, Electronics)
3. Netflix — Users: Members; Items: Movie
4. Facebook — Users: Members; Items: Members

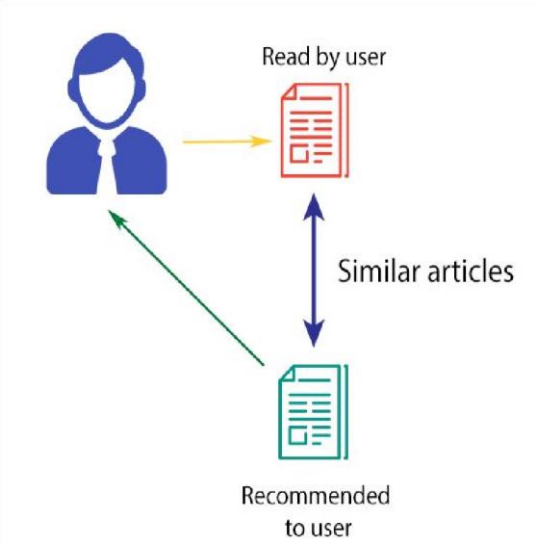
Implementing A Recommender System

1. Popularity / Rating Based System

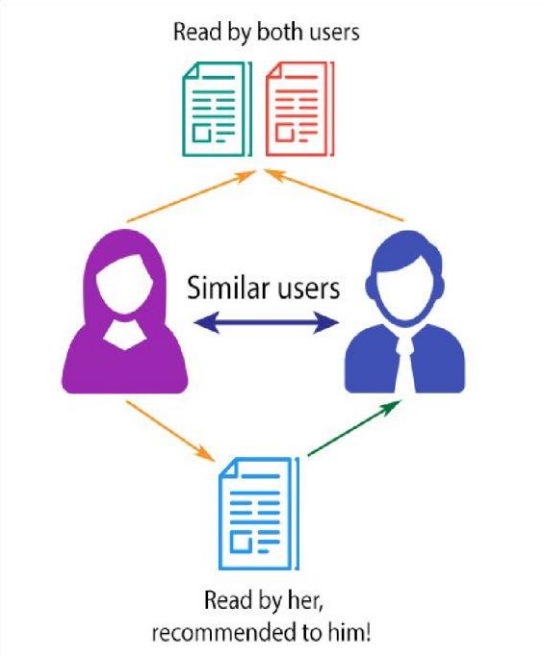


Implementing A Recommender System

2. Content Based



3. Collaborative Filtering

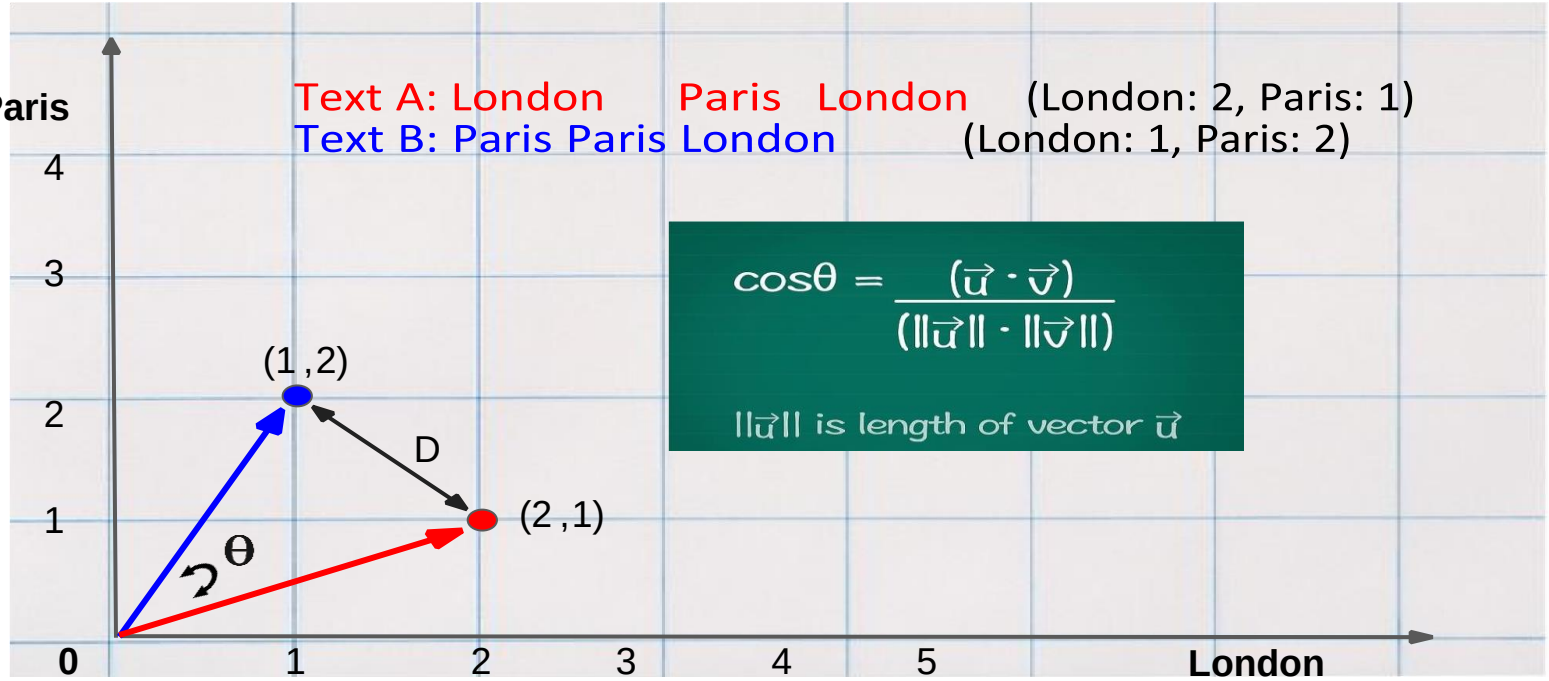


Similarity Between Content

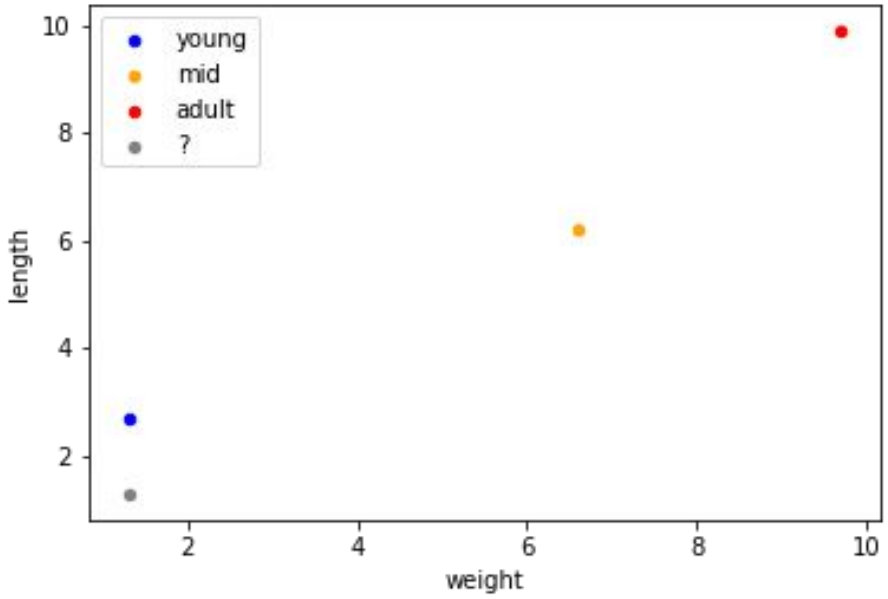
Text A: London Paris London

Text B: Paris Paris London

Distance Between Two Vectors



When To Use Angular Distance?



Quiz

In which of the following scenarios you are most likely to use Cosine Similarity measure?

1. Determining gender based on shoe length, height, weight etc.
